The story of July 2, 1863 is a story everyone familiar with the Battle of Gettysburg believes they know: Joshua Lawrence Chamberlain and the men of the 20th Maine stood alone on the slopes of Little Round Top and held back the onslaught of Confederate attacks, saving the position for the United States Army.

That story is a myth...

Using primary sources and contemporary accounts, the true story of the fight for Little Round Top presents a stark difference to the story as it is usually told. How did the story of this engagement get so distorted in popular perception? How did the man who arguably *should* be remembered as the *Hero of Little Round Top* get forgotten by history?
